DMIT

**orphosys
education**

ISO 9001:2015

DMIT, which stands for Dermatoglyphics Multiple Intelligence Test, is a method that analyzes fingerprint patterns and our brain activities to gain insights into an individual's inborn talents, innate abilities, learning styles etc. It is based on the scientific method understanding that each person's fingerprints are unique and can provide information about their neurological development.

There are three types of DMIT services:

- **Lifetime DMIT:** This type of DMIT aims to assess an individual's multiple intelligences and provide insights into their potential strengths and weaknesses. It can help parents and educators to understand a child's learning style, aptitudes, and areas of interest. The results of the Lifetime DMIT are often used to guide educational and career decisions.
- **Compatibility DMIT:** Compatibility DMIT focuses on analyzing the fingerprints of two individuals to determine their compatibility in various aspects such as personal relationships, business partnerships or marriage. It aims to provide insights into the strengths and areas of compatibility between two individuals based on their fingerprint patterns.
- **Corporate DMIT:** Corporate DMIT is tailored for the corporate sector and aims to assess employees' strengths, abilities and potential job roles based on their fingerprints. It can assist in talent management, team building, and career development within an organization.
- Some experts argue that the link between fingerprints and intelligence or personality traits is not well-established scientifically. Therefore, it is advisable to approach DMIT with caution and rely on a more comprehensive assessment that includes multiple factors when making important life decisions.

It is important to note that DMIT service is offered only by Orphosys Education Pvt. Ltd. So, if you are interested in exploring DMIT services provided by Orphosys Education, we recommend contacting us directly for more information about our methodology, the specific benefits we claim to offer, and any scientific evidence or research supporting their approach.

POSITIVE PARENTING PROGRAM

orphosys
education

ISO 9001:2015

Indeed, the rapid advancements in technology and the changing dynamics of the world have brought about new challenges in old parenting styles. As children adapt to the new methodologies of the modern world, parents need to develop their parenting style and adopt the new parenting style to foster better communication and understanding with their children. Nowadays, all parents want to create a better future for their children. Orphosys Education brings the solution to the problem. Orphosys Education seems to recognize the need for updating parenting approaches and bridging the communication gap between parents and children. By offering a program that teaches advanced parenting styles, they aim to provide parents with the necessary skills and knowledge to effectively communicate with their children and address the unique challenges of the modern era.

In the world, every person is good in nature. But what we say is always bad that is the behavior of human beings. For the last 7 to 14 years we have been able to convert this “bad behavior” to “good behavior” through this positive parenting program. This is the best highlight feature of our course which we provide to parents to make them advance with their children in this modern world. The Positive Parenting Program, also known as Triple P, is an advanced parenting program that can provide parents with updated strategies for fostering healthy parent-child relationships, promoting effective communication, and understanding the needs of their children in today's digital age. It focuses on building strong parent-child relationships, setting clear expectations, and using positive discipline strategies. It aims to equip parents with effective tools and strategies to understand and address their children's behavior while fostering their emotional well-being.

By participating in the Positive Parenting Program, parents can gain insights into child development, learn effective communication techniques and acquire strategies to manage challenging behaviors. The program provides practical guidance and support to help parents create a nurturing and positive home environment where children feel understood, respected, and loved. If you are interested in enrolling in the Positive Parenting Program offered by Orphosys Education Pvt. Ltd. we recommend reaching out to our office directly for more information on the course content, duration, and enrollment process. We will be able to provide you with specific details about how our program can address the challenges you are facing in your parent-child relationship.

ABACUS, VEDIC MATHS HANDWRITING TRAINING

HANDWRITING

Handwriting training teaches children the skills for clear and consistent writing, including fine motor development, letter formation, and spacing. It's a crucial foundation for academic success and effective communication.

ABACUS

Children use the abacus to learn math hands-on, improving number sense, spatial awareness, and basic arithmetic. The tactile experience boosts concentration, discipline, and prepares them for mental math. It also offers a cultural perspective, fostering early confidence in math.

VEDIC MATHS

Vedic math, inspired by ancient Indian techniques, simplifies calculations to enhance children's mental math skills. It boosts number sense, problem-solving, and overall math confidence, making the subject more accessible and enjoyable.
